

6301303 SPIN N EGG DYE KIT INSTRUCTIONS

Preparations:

Use cooled, hard-boiled eggs. Cover work area with newspaper or waxed paper.

Step 1

Place a dry, room-temperature egg into spinner. Knead dye packet thoroughly. Cut color packet from the easy-pour spout and carefully add 8-10 drops of one color.

Step 2

Place top on spinner. Make sure top is secured in place. Pump the top and watch the egg spin and cover with color. Add one or two more drops of color if necessary.

Step 3

Lift top, remove egg and liners and set aside to dry. Rinse spinner with warm water water and dry with paper towel between colors.

Step 4

Now try using a fun liner! Place liner on spinner and repeat steps. It's fun to watch even without dying eggs!
